

CTP

N-(cyclohexylthio) phthalimide

CTP is a pre-vulcanization inhibitor. It provides predictable scorch control in most sulphur vulcanization and improved cost performance through marginal stock recovery, single-stage mixing, etc. With higher processing and/or curing temperatures, the activity is linear and higher than most retarders. Bloom may occur above 0.5 phr. CTP functions as an anti-scorching agent for both NR and SR rubber. CTP crystal form provides free flowing and non-dusting characteristics.

Specifications:

Appearance	White or Grayish white, granules or crystals
*Melting Point, °C	90 min
*Moisture, %	0.5 max
*Ash Content, %	0.3 max
*Toluene Insolubles, %	1.0 max
*Assay, %	97 min
Specific Gravity, Typical	1.30
