

CUDD 70

CUDD 70 is an easy dispersing pellet form of CUDD combined with a polymeric binder. It is a high cure rate accelerator used in conjunction with thiazoles and sulfenamides in SBR and butyl rubber compounds. CUDD 70 also provides scorch-safe, rapid cure vulcanization in EPDM compounds when used with MBT. It is not recommended for use in light colored compounds.

Specifications:

Appearance	Dark brown to black soft pellet
*CUDD Content, %	70.0 (typical)
*Binder Content, % (By Calculation)	30.0 (typical)
Mooney Viscosity @ 50C (mL 1+4)	54.0 (typical)
Density, g/cm ³	1.43 (typical)

*Actual data will be reported on Certificate of Analysis
