

PE-100

Polyethylene wax

PE-100 is a low viscosity, low melt point polyethylene wax for use as a process aid, mold release agent and internal lubricant in many elastomers, particularly EPDM. It is also used as a slip aid in thermoplastics and prevents tack in green rubber.

Specifications:

Appearance	White/off white powder, flake or pastille
*Softening Point, °C	90 - 110
Specific Gravity	.95
Viscosity @2100 °F, cps.	10 - 40

*Actual data will be reported on Certificate of Analysis

03/2014
