

FS-150

Fumed Silica

FS-150 is amorphous, untreated silica that has very small particle size and possesses very high surface area. It is used in silicone rubber compounds, plastics, sealants, polyester resins and gel coats. FS-150 increases hardness, tensile and bond strength as well as resistance to abrasion and tearing.

Specifications:

Appearance:	White powder
*Surface area (BET) m²/g	130 –170
*Drying loss (105°C) ,%	<1.0
*pH	3.7 – 4.7

*Actual data will be reported on Certificate of Analysis

Standard Packaging: 10 kg plastic lined paper bags.
