

## FS-200

### Fumed Silica

FS-200 is amorphous, untreated silicone dioxide that has very small particle size and possesses very high surface area. It is used in silicone rubber compounds providing excellent reinforcement and in adhesives and sealants to improve adhesion as well as reinforcement. FS-200 is also used as an anticaking agent for powders.

#### Specifications:

Appearance:	White powder
*Surface area (BET) m <sup>2</sup> /g	175 –225
*Drying loss (105°C) ,%	<1.5
*pH	3.7 – 4.7

\*Actual data will be reported on Certificate of Analysis

Standard Packaging: 10 kg plastic lined paper bags.
